DETAILED ACTION

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1,2,6,8,14,16,18-24 are rejected under 35 U.S.C. 102(b) as anticipated by or, in the alternative, under 35 U.S.C. 103(a) as obvious over Kamiya '301.

The amendments and remarks filed by applicants have been fully considered. The claims remain unpatentable in view of the above rejections.

Applicants have argued that the prior art does not teach composition that include a first collection and second collection of particles having first and second shape.

The examiner submits that the prior art of record teaches collections of particles and since the applicants claims do not have any specific structural limitations such prior art particles include the claimed particles. In any event it would have been obvious to optimize shapes of particles to adapt particles for intended use.

The rejections based on double patenting have been withdrawn.
